Sir:

PETITION TO REVIVE
UNINTENTIONALLY ABANDONED APPLICATION PURSUANT TO 37 CFR §
1.137(b)

The entire delay in filing the required reply to the Office Action of April 7, 2004, from the due date for the reply until the filing of a grantable petition pursuant to 37 CFR § 1.137 (b) was unintentional.

Attached is a reply to the Office Action dated April 7, 2004, including a Request for Continued Examination (RCE) as required by 37 C.F.R. § 1.137(b)(1).

The petition fee required by 37 C.F.R. § 1.137(b)(2) is attached.

The above statement is submitted, pursuant to 37 C.F.R. § 1.37(b)(3). The undersigned notes that the applicants intended to file the attached Amendment, RCE and Information Disclosure Statement, however through inadvertent and unintended error by the undersigned, the attached were not filed on October 7, 2004. The

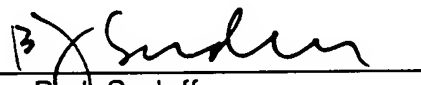

undersigned notes that 37 C.F.R. § 1.37(b) does not appear to require a petition for extension of time or extension fee however the Patent Office is authorized by the attached transmittal cover sheet to charge the undersigned's Deposit Account No. 14-1140 for any required fees.

Having met all of the requirements set forth in 37 C.F.R. § 1.137(b), it is respectfully requested that the above identified application be revived, and forwarded to the Examiner for action on the attached.

The Office is requested to contact the undersigned in the event anything further is required for grant of the present Petition.

Respectfully submitted,

Sir:

AMENDMENT

Responsive to the Official Action dated April 7, 2004, entry of the following amendments and remarks are requested along with the attached Request for Continued Examination (RCE). Return of an initialed copy of the attached PTO 1449 Form, pursuant to MPEP § 609, is requested.

AMENDMENTS TO THE CLAIMS:

Amend the claims as follows:

1. (Currently Amended) A process for treating at least a part of the human body, by applying at least two treatment products simultaneously to a localized area of said part of the human body as a function of characteristics of the localized area and/or of a predetermined design, in order to obtain a mixture of said treatment products directly on the localized area said mixture being produced in real time and on the site at which it is to be applied, a chosen coloration or make up design image taking into account the characteristics of the part to be treated being viewed prior to said applying~~said treating being viewed on a support other than said localized area prior to said applying.~~

2. (Original) The process as claimed in claim 1, in which the application of several treatment products is performed by jet.

3. (Original) The process as claimed in claim 2, in which at least one jet is produced by a thermal means capable of forming bubbles of treatment product.

4. (Previously Presented) The process as claimed in claim 2, in which at least one jet is produced by a piezoelectric means.

5. (Previously Presented) The process as claimed in claim 2, in which at least one jet is deflected.

6. (Previously Presented) The process as claimed in claim 1, in which at least one of the treatment products comprises at least one solvent in a proportion of at least 10% by weight.

7. (Previously Presented) A device for carrying out the process as claimed in claim 1, characterized in that it comprises a means for positioning said part of the human body, and a means for applying treatment products to said part as a function of a predetermined design.

8. (Original) The device as claimed in claim 7, characterized in that the application means comprises a plurality of treatment product reservoirs and a plurality of spraying nozzles, each nozzle being fed by a reservoir.

9. (Previously Presented) The device as claimed in claim 7, characterized in that the application means comprises at least two reservoirs and/or at least two nozzles.

10. (Previously Presented) The device as claimed in claim 7, characterized in that it comprises means for controlling the position of the application means relative to the part of the area to be treated.

11. (Previously Presented) The device as claimed in claim 7, characterized in that it comprises means for automatic control of the total amount and of the partial amounts of each product as a function of the desired visual characteristics.

12. (Previously Presented) The process of claim 1 wherein said treating comprises at least one of caring for, making up or coloring at least a part of the human body.

13. (Currently Amended) A process for treating at least a part of the human body by applying at least two treatment products simultaneously to a localized area of said part of the human body as a function of characteristics of the localized area and/or of a predetermined design, in order to obtain a mixture of said treatment products directly on the localized area, said mixture being produced in real time and on the part at which it is to be applied, a step of viewing a chosen coloration or make-up design image taking into account the characteristics of the part to be treated taking ~~taking~~ place before any treatment product is applied.

14. (Currently Amended) A process for treating at least a part of the human body by applying at least two treatment products simultaneously to a localized area of said part of the human body as a function of characteristics of the localized area and/or of a predetermined design, in order to obtain a mixture of said treatment products directly on the localized area, said mixture being produced in real time and on the part at which it is to be applied, a step of viewing a chosen coloration or make-up design image taking into account the characteristics of the part to be treated taking place before caring for or making up products are applied.

15. (Previously Presented) The process of claim 13 wherein said treating comprises at least one of caring for, making up or coloring at least one part of the human body.

Claim 16. (Canceled)

17. (new) The process according to claim 14, wherein said applying is made according to a calculation of the instantaneous amounts of each product for each elementary area of the part to be treated as a function of the characteristics of said elementary area.

18. (new) The process according to claim 13, wherein said applying is made according to a calculation of the instantaneous amounts of each product for each elementary area of the part to be treated as a function of the characteristics of said elementary area.

19. (new) The process according to claim 1, wherein said applying is made according to a calculation of the instantaneous amounts of each product for each elementary area of the part to be treated as a function of the characteristics of said elementary area.

REMARKS

Reconsideration is requested.

Claim 16 has been canceled above, without prejudice. Claims 17-19 have been added and find support, for example, on page 15, lines 10-20 of the specification. No new matter has been added.

Claims 1-15 and 17-19 are pending.

The present application has become unintentionally abandoned for failure to file the present response and attached RCE by the October 7, 2004 due date.

A Petition to revive the application pursuant to 37 CFR § 10137(b) is attached along with the requisite petition fee is attached.

The entire delay in filing the required reply to the Office Action of April 7, 2004, from the due date for the reply until the filing of a grantable petition pursuant to 37 CFR § 1.137 (b) was unintentional.

Grant of the attached Petition, entry of the present Amendment and attached RCE and return of an initialed copy of the attached PTO 1449 Form, pursuant to MPEP § 609, are requested.

The Examiner's indication that a certified copy of the priority document has not been received by the Patent Office is noted. While the applicants believe it is the responsibility of the Patent Office to obtain a certified copy of the priority document from the International Bureau, pursuant to PCT Rule 17.2, a further certified copy of the priority document is attached hereto. The Examiner is requested to acknowledge receipt of same in the Examiner's next Communication.

Claim 16 has been canceled above, making moot the Rule 75 objection of same.

Claim 1 has been amended to obviate the Section 112, first paragraph, rejection of claim 1. Reconsideration and withdrawal of the Section 112, first paragraph, rejection of claim 1 are requested.

The above amendments are submitted to obviate the Section 112, second paragraph, rejection of claims 1-12 and withdrawal of the Section 112, second paragraph, rejection is requested.

The Section 102 rejection of Claims 1, 6 and 12 over Suares (U.S. Patent No. 5,612,044), is obviated by the above amendments. The claims are submitted to be patentable over the cited patent. The applicants submit that the Examiner's interpretation of "as a function of the characteristics of the localized area" is in contradiction with the definition provided in the specification at, for example, page 3, lines 2-10. Clarification of the Examiner's position is requested in the event the rejection is maintained. Withdrawal of the Section 102 rejection of claims 1, 6 and 12 over Suares is requested.

The Section 102 rejection of claims 1, 2, 5 and 7-16 and Section 103 rejection of claims 3, 4 and 6 over Weber (U.S. Patent No. 6,341,831), are obviated by the above amendments. The applicants believe that the cited art does not teach or suggest, for example, the selection of a coloration or makeup design image taking into account the characteristics of the part to be treated, as presently claimed. Withdrawal of the Section 102 and Section 103 rejections of the noted claims over Weber is requested.

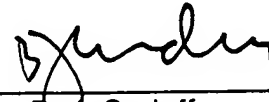

COPY

The claims are submitted to be in condition for allowance and a Notice to that effect is requested. The Examiner is requested to contact the undersigned in the event anything further is required in this regard.

Respectfully submitted,

NIXON & VANDERHYE P.C.
